Dear Sir

RESULT OF SUPER RESURS 20W50 ENGINE OIL TEST ON OUR BUS

Our Company's SETRAC Bus was serviced with 6 liters of the free engine oil sample on the 7th of September, 2021, and operated the vehicle till 23 October, 2021. Please find attached the detailed tracking report of the vehicle for the test period, from which the following are evident.

Total distance covered	10,283km
Total travel time	177Hours
Total Idling time	59 Hours
Total journey time	237 Hours

The following were observed during the entire test period.

1. The usual knock-like noise we usually observe immediately after servicing a SETRAC bus was not observed. The engine noise was much lower than anticipated which is good.
2. The colour of the engine oil did not turn completely black all through the test period which is usually the case with most engine oils.
3. The viscosity of the oil remained fairly stable all through the period. There was no knocking sound even after 10,000km.
4. We did not expect an ordinary mineral oil to take us through 10,000km. This one did. The SETRAC would ordinarily start showing a knocking sound with the other synthetic oils we used once it reached 6,000km.

I write to confirm that the **Super Resurs 20W50 engine oil** for petrol engines can lubricate an engine for up to 10,000km without adverse effect.

Thanks.

Sincerely,

Onwuka Akuma
Head, Fleet Maintenance
